

PROFILI **NOBILI** POLIMERO DURO

DECOR

LEGEN DA

Polimeri Duri

Prodotti realizzati in Polimeri duri, un materiale molto resistente ed ecologico con alta densità e resistenza ai danni meccanici.

Poliuretano

Prodotti realizzati in poliuretano, un materiale duro ma leggero con densità che consente la creazione di ornamenti nitidi e profondi.

Scratchshield

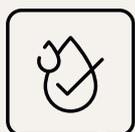

I battiscopa sono soggetti a numerose sfide quotidiane. Ecco perché abbiamo sviluppato l'innovativa Tecnologia ScratchShield, che consiste nell'estremamente indurente i nostri battiscopa. La differenza è enorme e evidente quando cercando di graffiare il battiscopa con uno strumento affilato. La resistenza dei battiscopa con tecnologia ScratchShield è superiore del 24%.

Battiscopa standard: La resistenza si misura con una resistenza metro ed espresso in scala Shore.

Lightguard: Le cornici alloggio led Mardom Decor sono dotate dell'esclusivo Light Guardo Technologie, che elimina completamente la penetrazione della luce LED attraverso la superficie di stampaggio.

Flessibile: Prodotto disponibile nella versione flessibile, destinata all'utilizzo su pareti semicircolari o irregolari. Gli articoli flessibili hanno una lunghezza di 200cm.

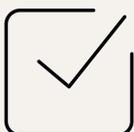

Multifunzionalità: Alcuni articoli sono multifunzionali, consentono l'installazione in diverse varianti: come battiscopa, cornici per pareti e gusci per pareti e soffitti.

Resistente all'umidità

Materiale ecologico

Qualità eccellente

Facile installazione

Verniciabile

CHI SIAMO

DECOR

Chi siamo

Mardom Decor è uno dei marchi leader nella produzione di profili decorativi e stucchi.

I prodotti sono realizzati con materiali impermeabili di altissima qualità, che garantiscono una perfetta durabilità per molti anni.

L'assortimento comprende centinaia di modelli, creati in collaborazione con rinomati industriali progettisti.

Creiamo prodotti dedicati a tutti gli interni: stili dal minimalismo e forme semplici a quelle ricche e decorazioni classiche.

I prodotti Mardom Decor sono apprezzati dai clienti, ecco perché sono stati premiati in molti prestigiosi concorsi di settore.

Materiali

I prodotti Mardom Decor sono composti da 2 tipologie di materiale: Duro Polimero e Poliuretano.

Ognuno di loro ha le proprie caratteristiche e usi, ma hanno una cosa in comune, entrambi sono impermeabili e duraturi.

Finiture

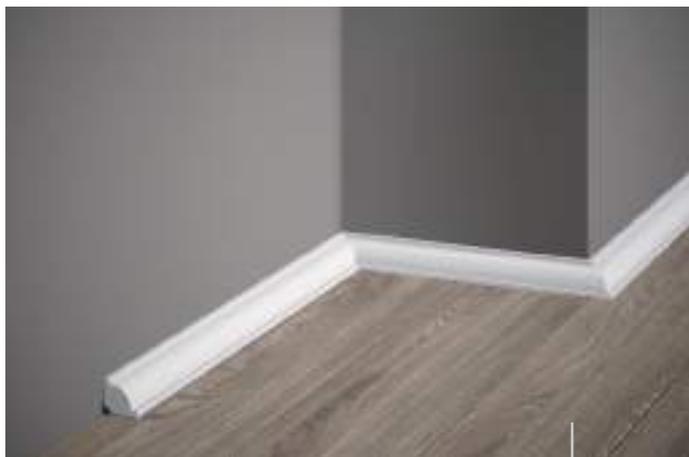

Il battiscopa Mardom Decor standard, fa parte di una collezione di prestigio, resistente all'acqua, non necessita di verniciatura, è rifinito con rivestimenti esclusivi che conferiscono ai prodotti un aspetto semplice ed elegante, una perfetta levigatura e di colore bianco come la neve.

L'applicazione consiste semplicemente nell'attaccare, il prodotto alla parete, senza essere verniciato successivamente. I battiscopa Mardom Decor sono resistenti all'acqua, possono essere installati in bagni e cucine.

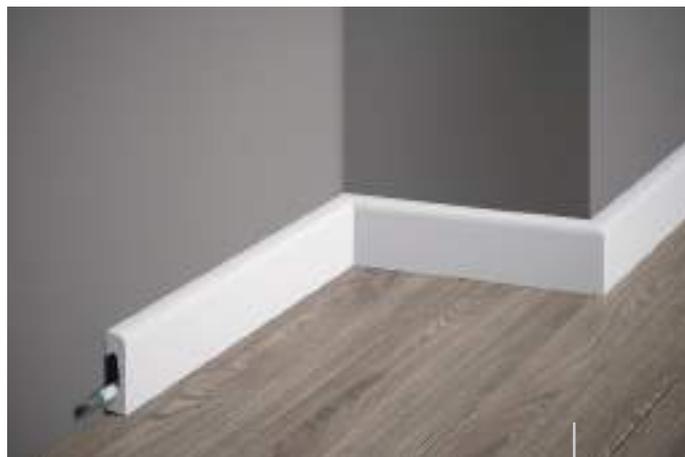

In aggiunta alla sua eccezionale durata e funzionalità, il prodotto impressiona con il suo bell'aspetto.

Fix Pro

L'adesivo Mardom Decor Fix Pro si asciuga rapidamente e lega saldamente gli elementi decorativi ai substrati dell'edificio, ovvero intonaci minerali, cartongesso, gesso, calcestruzzo, mattoni, ma anche legno e materiali affini. Il collante non contiene solventi nocivi nella sua composizione. Non cola dal soffitto e dalle superfici verticali. Può essere utilizzato per livellare piccole irregolarità del supporto.

Dopo l'asciugatura l'adesivo può essere verniciato.

Contiene 300ml

confezione 15 pezzi

Max

La colla Mardom Decor MAX, come abbiamo già detto, si lega molto rapidamente: bastano solo otto secondi per fare presa. Ha un colore bianco. Questa è una delle nostre proposte per compiti speciali. È progettato sia per substrati lisci che porosi, adatto per profili di grandi dimensioni e verticali.

Dedicato all'installazione interna. La capacità di un tubo corrisponde alla possibilità di installare circa 8-9 metri lineari di materiale.

Contiene 290ml

confezione 15 pezzi

Fix Extra

La colla Mardom Decor Fix Extra è un agente legante che fornisce un legame durevole e forte in modo rapido ed efficiente alle giunture.

La varietà di colla presentata non ha colore, non contiene solventi ed è sicura per gli elementi decorativi e per l'ambiente dopo l'essiccazione.

Impermeabile.

Contiene 300ml

confezione 15 pezzi

Filler

Il composto per fughe Mardom Decor è ideale per mascherare le fughe dello stucco ed eventuali cavità, crepe e fessure fino a 5 millimetri di dimensione.

Può essere utilizzato su gesso, mattoni, calcestruzzo, pietra, cemento e superfici verniciate. Il prodotto riempie efficacemente le lacune, ripara i difetti e leviga la struttura.

Il composto è resistente all'umidità, il che significa che l'azione dell'acqua o dell'umidità non provoca crepe sulla superficie. Il composto per giunti Mardom Decor è molto flessibile, malleabile e facile da lavorare.

Dopo che è completamente asciutto, il luogo in cui viene utilizzato, il composto deve essere levigato con carta vetrata fino a ottenere l'effetto visivo desiderato. Si consiglia di verniciare dopo aver atteso 24/48 ore [a seconda dell'umidità e della temperatura all'interno].

Contiene 330ml

confezione 24 pezzi
